ACME ENTERPRISE GLOBAL BRAND GUIDELINES

Document ID: DOC-ACME-2026-V2 | Version 2.4 | Status: Active Approved

Authorized by: Global Governance Council & Compliance Office

Section 1: Core Voice and Messaging Standards

Rule 1.1: Precision and Empirical Suboodination

All outbound marketing collateral must reflect empirical accuracy and factual restraint.

Unsubstantiated superlative claims such as market leader or unchallenged superior performance

are strictly prohibited across digital, print, and sales pitch decks.

Section 1.2: Transparency and Trust

Marketing communications must clearly delineate between beta software features and general availability.

Roadmap commitments shall not be phrased as guaranteed delivery dates.

Customer quotes and testimonials must have documented legal consent on file before publication.

Section 2: Cloud Infrastructure & Enterprise SLA Warranties

Rule 2.1: Prohibition on Zero Downtime Promises

RULE 2.1: Zero downtime guarantees and 100 percent uptime declarations are strictly prohibited.

All enterprise collateral must state that uptime SLAs exclude scheduled maintenance windows and external upstream cloud provider outages.

Rule 2.2: Disaster Recovery and Latency Commitments

Claims of instantaneous failover or zero data loss are prohibited without explicitly qualifying the requirement for active-active multi-region database replication architecture.

Sub-millisecond latency assertions must cite benchmark methodology and standard p99 bounds.

Section 3: Environmental Directives & Sustainable Packaging

Rule 3.1: Biodegradable and Recyclable Claims Mandate

RULE 3.1: Packaging may only be described as 100 percent recyclable or biodegradable if certified under ASTM D6400 or EN 13432 industrial composting standards.

Vague eco-friendly or green packaging buzzwords without third-party laboratory proof are forbidden.

Rule 3.2: Carbon Neutrality Claims

Declarations of net-zero footprint or carbon-neutral operations must cite third-party audit verifications adhering to ISO 14064 or Greenhouse Gas Protocol Scope 1, 2, and 3 accounting.

Section 4: Healthcare and Clinical Efficacy Limitations

Rule 4.1: Prohibition on Absolute Medical Efficacy

RULE 4.1: Claims that any product cures, prevents, or reverses diagnosed medical conditions are strictly forbidden under FDA and FTC truth-in-advertising statutory mandates.

All wellness claims must include mandatory disclaimer: These statements have not been evaluated by the Food and Drug Administration.

Rule 4.2: Clinical Trial Citation Requirements

Efficacy statistics must cite NCT registry numbers, peer-reviewed journal DOI links, and double-blind sample sizes of at least one hundred participants.
